All cars handled under this tariff are subject to demurrage rules and charges.

DEFINITION OF RECIPROCAL SWITCHING – ITEM 3020

- A. The term "reciprocal switching" means the movement in switching service for loading or unloading, preceding or following a road haul movement over another railroad, from or to 'tracks served by BOCT', to or from the point of interchange with the connecting railroad at the switching station, and the movement of the empty car in the reverse direction.
- B. When the interchange between BOCT and a connecting railroad is effected by an intermediate railroad, charges assessed by the intermediate railroad will be in addition to the charges assessed by BOCT.

EMPTY CARS RETURNED TO CONNECTING CARRIER – ITEM 3030

When an empty car is received from BNSF for loading at an industry located on BOCT, and car is refused by the industry because car is not in proper condition to load and car must be returned to BNSF, reciprocal switching charge will be assessed against BNSF. The charge will be assessed in one direction only.

FIRST PLACEMENT CONSTITUTES DELIVERY – ITEM 3040

Except as otherwise published herein, when cars are placed for loading or unloading upon switches, side tracks, team tracks, or at warehouses, elevators or other industries or locations reached by BOCT, such placement shall constitute delivery of car for loading or unloading. Any subsequent switching movement within prescribed switching limits of the station at which the service is performed will be subject to the local transportation charge.

SWITCHING MORE THAN ONE CAR IN A SHIPMENT; ARTICULATED CARS – ITEM 3050

- 1. Switching charges apply to each platform or unit of so-called "articulated cars".
